BASIC MOVEMENT

The Diagram below shows the eight basic D-Pad positions that are used in the game.

Important Note: The diagram shows the D-Pad positions for a player facing to the right. The controls are reversed when facing to the left.

THROWS AND HOLDS

Each fighter in Super Street Fighter II has a number of different throws and holds. These throws and holds can only be done when the two fighters are within "Grabbing Range." The Grabbing Range for each character is different, but most throws and holds are done when two fighters are right next to each other.

THROWS allow you to grab an opponent and toss them across the room. Some fighters can even do throws in mid-air.

For Example: It is possible for Ryu to grab Ken and throw him over his shoulder. To do the Shoulder Throw, Ryu must push forward against Ken and then you must push the Hard Punch (Fierce) button on your D-Pad.

HOLDS allow you to grab an opponent and then hit or bite them again and again.

For Example: It is possible for Blanka to bite Guile on the head. To do the Head Bite, Blanka must push forward against Guile and then you must push the Hard Punch (Fierce) button on your D-Pad.

Practice with your favorite character to discover which throws or holds they have and how to use them to your advantage.

SPECIAL MOVES

Each character has developed his or her own special moves for use in combat. All the special moves for each character are listed in *The New Challengers* section of this manual. There are also descriptions telling you how to do these special moves.

Special Moves are very hard to learn, it may take weeks before you can do them every time. Keep practicing them until you get them right!

Below is an example of the diagram for Chun Li's Kioken Fireball. The arrows in the diagram indicate the necessary movements on the D-Pad. Please refer to the movement diagram on page 7 if you are unsure of what the arrows mean.

*For Example: Chun Li's Kioken Fireball

Tournament of Champions

The challenge has been issued and four brave young fighters have answered the call. Cammy, Fei Long, Dee Jay and T. Hawk all have their own reasons for entering the tournament and each will let nobody stand in their way!

Choose SUPER BATTLE on the main game selection screen and you will be able to select your character for the tournament. As the tournament begins, your fighter will travel the globe to meet one of sixteen other fighters.

When the match begins, you must use all of your fighting skills to defeat your opponent. Each time you hit, kick or throw your opponent, his energy meter will decrease. Once his energy meter is totally red, he'll be knocked out and you will be declared the winner. Win two out of three rounds and you earn the right to face the next challenger on your way to face the awesome might of M. Bison!

The Super Battle Mode

In the SUPER BATTLE mode, you will choose a fighter and attempt to defeat all the other challengers to earn the right to face M. Bison and the other Grand Masters. If you succeed, you will see a story ending for your character which will complete his or her quest for the championship.

The SUPER BATTLE Mode does allow a second player to join in and fight against you at any time. The second player must hit the **START** Button on his Control Pad and after a moment the game will return to the character selection screen and allow the player to choose his character.

The VERSUS Battle Mode

The VERSUS Battle allows two players to battle head-to-head in a series of matches. When the Title screen appears, push the D-Pad up or down to move the pointer next to VERSUS BATTLE and press the **START** Button. On the next screen, there are two options: **HANDICAP** and **STAGE SELECT**. Player One can press the **D-Pad** to highlight either the **HANDICAP** or **STAGE SELECT** option.

HANDICAP When the **HANDICAP** option is highlighted, both players can press left or right on the D-Pad to set their **ATTACK LEVEL**. The number of stars showing determines the amount of damage players' punches and kicks will do. The higher the number of stars, the greater the amount of damage the punches and kicks will do.

The VERSUS Battle Mode, cont.

STAGE SELECT When the **STAGE SELECT** option is highlighted, Player One can select the location of the match by pressing the D-Pad left or right. This option allows you to select the location of your fight.

After all the choices have been made, Player One can begin the match by pressing the **START** Button.

Choose the GROUP BATTLE option on the main screen and press the START Button. When the rule screen appears, press the D-Pad up or down to select the tournament rules you are going to use.

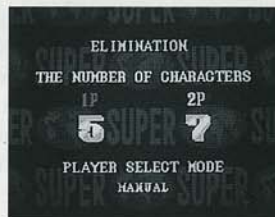

POINT MATCH

In this mode, the winner of the round will be given 8 points plus 1 point for each second left on the clock when his opponent is knocked out. In the case of a draw the team which has the most points will have 4 points deducted from its score. The matches will continue until all matches have been played or until a winner is determined.

ELIMINATION

In this mode each player chooses up to eight characters. (Players do not need to choose the same number of characters.) If a player wins a match he can continue to use the same character until he is defeated. The first player to lose all his characters, loses the match.

The Group Battle Mode, cont.

On the next screen players will select the number of characters they will use. (If you are playing an elimination match, each player will set their own number of characters.) Press the D-Pad up or down to increase or decrease the number of characters. Press the D-Pad left or right to switch between MANUAL and AUTOMATIC character selection. After you have finished, press the START Button to proceed to the next screen.

If you make a mistake and choose the wrong option, press Button A, B, C, X, Y or Z during the "Number of Characters" screen and you will return to the main "Battle Mode Select" screen.

After both players have chosen all their characters, the HANDICAP and STAGE SELECT screen will automatically appear. Use the D-Pad to make your selections just as in the VERSUS BATTLE mode and press the START Button to begin the tournament.

Once the battle is over and the victory screen appears, press Button A, B, C, X, Y or Z to bring up a menu which will allow you to continue or quit the mode.

The Tournament Battle Mode

In the TOURNAMENT BATTLE, up to eight players can compete for the Street Fighter Championship. After you select TOURNAMENT from the main screen, the first player can select his character. After this has been done, the second player can choose his character. When everyone has selected his character, highlight END and press the **START** Button.

(If you don't have eight people to play with, the computer will automatically pick other fighters and control them in battle against you.)

When the tournament begins, each player will be assigned a preliminary match. Before each match, you will be able to select the attack level of your character, just as in the VERSUS mode. After you have done this, press **START** and the match will begin.

Each match is only 1 round. If you lose, you will fight the losers of the other matches to decide your final ranking. If you win, you will advance to the semi-finals and be one step closer to the championship.

The Challenge Modes

The TIME CHALLENGE tests your speed and quickness as you try to knock out a computer opponent in the fastest time possible.

The SCORE CHALLENGE tests your skill at combinations as you try to knock out a computer opponent and score big points.

After you select TIME CHALLENGE or SCORE CHALLENGE, you will need to choose your character and press the **START** Button. After you have selected your character, choose the 2P character for the computer to control and press the **START** Button.

When the battle begins, you have one round to knock out your opponent as quickly as possible. If you succeed in breaking the CAPCOM records, you will earn the right to enter your initials as one of the greatest street fighters in the world!

Once the battle is over and the victory screen appears, press Button **A**, **B**, **C**, **X**, **Y** or **Z** to bring up a menu which will allow you to continue or quit the mode.

Important Note:

TIME LIMIT

This option allows you to turn on or off the Time Limit. Push the D-Pad left or right to highlight either YES or NO. If you select YES, the fighters will have 99 seconds to knock each other out. If you select NO, the fight will continue until one player is knocked out.
